

Any Tank Is A Mixing Tank

WHO WE ARE

Established in 1992, Premier Six stands for the most innovative, reliable and cost-effective mixing solution for multiple industries. Premier Six ultimately serves as a yardstick for the Group to benchmark against the standards of leading companies around the world.

HOW IT WORKS?

- 1 Compressed air is released in pulsing pattern at bottom of the tank, sweeping the product across.
- 2 Compressed air forms big bubble as it rises up the tank, pushing the bottom product upwards.
- 3 Due to a displacement effect, the product from the side rushes in, creating a vertical mixing action.
- 4 The big bubble pops at the surface, pushing the product to the side and down, creating a circular

Pulse Air Mixing System PAINT MIXING

FEATURES & BENEFITS

Versatility

- ◇ Customized for any tank size.
- ◇ Retro-fits for new tanks - highly flexible
- ◇ Eliminates need for costly electrical mixer that needs to be explosion proof

Other Benefits

- ◇ Eliminates risk & repellency
- ◇ Use less energy than alternative options
- ◇ Helps control foaming, storing & air entrainment

Improve Product Efficiency

- ◇ Achieve homogenous paint mixture faster & easier
- ◇ Eliminates downtime and reduce mixing time
- ◇ Brings finisher product to full colour strength after adding leaf pigments & powder additives

Everything
looks better
