

Fujairah Oil Terminal

Contract Value: USD \$ 300,000.00

Date Completed: June 2017

Number of Tanks: Six (06)

Capacity: 15,000 ~ 30,000 m³

Product Type: Fuel Oil blending

Fujairah Oil Terminals (FOT) is a world class 1.177 million cubic meter onshore oil storage facility based in the rapidly developing port of Fujairah, located in the United Arab Emirates.

Premier Six was awarded the Pulse Air Mixing system contract Phase I, providing blending solution for 2 numbers of the terminals storage tanks.

After several months of usage and testing, the system has greatly improved the operations productivity by decreasing the blending time. Phase II of the project was then carried out which involves 4 additional storage tanks to be incorporated with the Pulse Air mixing system.

The project was completed on schedule thanks to the extensive planning and coordination works with the EPC even though the teams are ocean apart, in different countries and time zones.
